

Dock Report
Annual Owners Meeting
October 21, 2017

- Currently, appx 20 deck boards need replacing and this number will probably increase by Community Work Day, May 2018. We have asked for a 2018 budget that includes 30 new boards. *INCLUDED IN BUDGET*
- An outlet was replaced by the slip occupied by Gil Paradies. We have one spare.
- The water shut off valve for the frost free spigot needs to be replaced and Maurice is attempting to schedule that repair with John Bauer. It is not clear how water to that spigot is shut off. There is the possibility that the water to the entire Bldg 5 will have to be shut off to facilitate the repair. The Committee investigate and report.
- The top boards on the dock ramp guard rail need some attention. Evidently there is some mold on them and they may need to be recoated.
- The dock is scheduled to be winterized on November 25, weather permitting.
